

**Tru Tique** color wash from Walttools is a water born antiquing color wash solution used for providing that two-toned, mottled affect normally associated with the use of traditional powder releasing agents. It is generally used when clear liquid release is used. It's proprietary formula includes specialty polymers for proper penetration and adhesion to the substrate. This unique color agent is very easy to apply and can be applied to virtually any concrete substrate. This unique powder is supposed to be mixed with water and applied as a liquid wash coat. The heavy liquid will run off the high points and settle in the lowest parts of the design providing that desired contrast.

In addition to being used as a color replacement when not using powder release, Tru Tique color wash can be used to restore and rejuvenate older concrete that has lost its battle with the elements. Remove any old sealer, apply color wash and then reseal with a standard high quality sealer.

The color pallet mimics that of the existing accent powder release agent so you can maintain color schemes while using different products as needed.

1500-3000 square feet per bucket based on blend strength.

Very easy to apply. Each bucket come with a small plastic 2 oz scoop. Add 2, 4 or 6 ounces to a gallon of water depending on desired look. Mix thoroughly, apply liberally by sprayer, brush, watering can, etc., to the surface and watch it begin to settle in the appropriate places. Once the slab is dry, you can still remove and color is areas you find to heavy in color with water agitating with a broom.

One 3 lb pail will treat 1500-300 sq ft based on blend strength.

Tru Tique is compatible with both plain and colored concrete as can be used with other Walttools stain products such as acid stains, water base stains and almost any sealer.

For professional use only - Refer to Data sheet and SDS for further information. Always test color product for compatibility before full use. Keep out of reach of children - Store in cool dry place for up to a year.
